[MPEG Video of Launching the South Launch \(4MB\)](#) **NEW**

# Glide Angles for Hat Creek Rim

There are interactive areas on this map

**Note;**  
 This information should be used as a general reference only. Pilot skill, type of glider, time of day, wind direction, velocity and buoyancy, among other things, play a vital role in getting to any LZ.

This example shows the glide angle to the edge of the bench below launch and then the glide from the crest of that bench to the Buttonhook LZ. You MUST clear the bench to use the Buttonhook LZ!
